

**CompTIA Security+ 2008 Edition**

**CompTIA Security+**

# Contents

## Introduction

- Topic A: About the manual
- Topic B: Setting your expectations
- Topic C: Re-keying the course

## Mitigating Threats

- Topic A: Core System Maintenance
- Topic B: Virus and spyware management
- Topic C: Browser security
- Topic D: Social engineering threats
- Unit summary: Mitigating threats

## Cryptography

- Topic A: Symmetric cryptography
- Topic B: Public key cryptography
- Unit summary: Cryptography

## Authentication Systems

- Topic A: Authentication
- Topic B: Hashing
- Topic C: Authentication systems
- Unit summary: Authentication systems

## Messaging security

- Topic A: E-mail security
- Topic B: Messaging and peer-to-peer security
- Unit summary: Messaging security

## User and role based security

- Topic A: Security policies
- Topic B: Securing file and print resources
- Unit summary: User and role based security

## Public key infrastructure

- Topic A: Key management and life cycle
- Topic B: Setting up a certificate server
- Topic C: Web server security with PKI
- Unit summary: Public key infrastructure

## **CompTIA Security+ 2008 Edition**

### **Access security**

- Topic A: Biometric systems
- Topic B: Physical access security
- Topic C: Peripheral and component security
- Topic D: Storage device security
- Unit summary: Access security

### **Ports and protocols**

- Topic A: TCP/IP review
- Topic B: Protocol-based attacks
- Unit Summary: Ports and protocols

### **Network security**

- Topic A: Common network devices
- Topic B: Secure network topologies
- Topic C: Browser-related network security
- Topic D: Virtualization
- Unit summary: Network security

### **Wireless security**

- Topic A: Wi-Fi network security
- Topic B: Non-PC wireless devices
- Unit summary: Wireless security

### **Remote access security**

- Topic A: Remote access
- Topic B: Virtual private networks
- Unit summary: Remote access security

### **Auditing, logging, and monitoring**

- Topic A: System logging
- Topic B: Server monitoring
- Unit summary: Auditing, logging, and monitoring

### **Vulnerability testing**

- Topic A: Risk and vulnerability assessment
- Topic B: IDS and IPS
- Topic C: Forensics
- Unit summary: Vulnerability testing

### **Organizational security**

- Topic A: Organizational policies
- Topic B: Education and training
- Topic C: Disposal and destruction

#### **CCBOOTCAMP**

## **CompTIA Security+ 2008 Edition**

Unit summary: Organizational security

### **Business continuity**

Topic A: Redundancy planning

Topic B: Backups

Topic C: Environmental controls

Unit summary: Business continuity

### **Certification exam objectives map**

Topic A: Comprehensive exam objectives

### **CompTIA Security+ 2008 acronyms**

Topic A: Acronym list

### **Course summary**

Topic A: Course summary

Topic B: Continued learning after class

### **Glossary**

### **Index**
